

# West LRT Project

## Community Advocate

**Bob Keith, P. Eng.**  
Engineering Consultant

The West LRT Office is pleased to announce the appointment of Bob Keith for the Community Advocate position. With more than 30 years combined experience in public transit and transportation infrastructure, Bob has a wealth of knowledge to share with the West LRT station committees' participants. For the past six years, Bob has been working as an engineering consultant with The City of Calgary's Transportation Infrastructure department.

During his tenure at The City of Calgary, Bob participated in a number of public engagement programs as a project engineer and consultant on LRT extensions to Fish Creek-Lacombe, Dalhousie, McKnight-Westwinds and Crowfoot.

In addition to LRT extensions, Bob participated in public engagement activities for many of Calgary's interchanges during his time with The City's Transportation Planning department. Most recently, he was project manager for the planning of the future Bowfort Road / Trans Canada Highway interchange, which included meetings with various public groups. Through all his project experience, Bob has met and worked with numerous community associations, businesses and property owners. During his time with The City, Bob even hosted a bi-weekly radio phone-in show focusing on City of Calgary transportation issues.

In his spare time, you can find Bob doing his best Lanny MacDonald impression at the local hockey rink or carving a turn or two behind his boat at his British Columbia lakeside get-away.
